

Little Remodeler Playhouse

Jeannette L. Smith, inventor

Abstract

A playhouse kit which includes a building constructed of any material when completely finished leaves a paintable outside surface and a clean, slick, nonporous inside surface which will be able to have additional materials inserted into the front of the house, the roof, and the floor, altering its appearance and will also come with cans of paint, a brush, roller and paint tray allowing the child to paint the playhouse and will come with plain paper with no design, stamps and stamp pad(s) so that the child can make their own wallpaper which will either have an adhesive already sprayed on one side or will come with a can of spray on adhesive giving the wallpaper the ability to be applied, taken down and reapplied repeatedly and will come with a variety of additional materials which can be added to the roof, floor and front of the house altering its appearance.
